

STORAGE

COB

Lithium battery storage container

- Steel structure with insulating material
- Forklift handling
- Stackable up to 3 units
- Load capacity: 1,000 kg

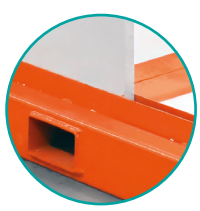

01 Place the batteries in the container

02 Cover the batteries with vermiculite bags

03 Close with the shell and place in the storage area

Insulated closure shell – Fire protection and containment

Insulation with fibre cement panels

Passive fire protection system with vermiculite

Forklift access openings

		COB 143N82400	
External dimensions		3110 × 2110 × 855	mm
Internal dimensions		2800 × 1800 × 400	mm
Insulation	Floor, walls, shell	Fibre cement panels – 2 × 12.5 mm	
Reaction to fire		Class A1 (DIN EN 13501-1)	
Fire protection		Passive system with TNT bags and vermiculite (not included)	
Maximum load capacity		1000	kg
